## Programming languages

Java

Kotlin

JavaScript

Typescript

## Frameworks & Tools

Spring Boot

React

React Native

NextJS

Node.js

pSQL

Docker

Kubernetes

Github Actions

CircleCI

RabbitMQ

Redis

## Summary

Experienced Software Engineer with a strong background in building web and mobile applications, specializing in developing user-focused solutions in close collaboration with project managers in agile environments. I have a proven track record of delivering innovative and efficient tools, taking ownership of complex features, and ensuring seamless functionality across various platforms.

## Experience

### reev

Aug 2020 - Present

Senior Software Engineer

Zagreb

🌐 <https://reev.com>

- Collaborate closely with project managers to identify optimal solutions for product development and take ownership of various features.
- Work in a microservice architecture to ensure system decoupling and scalability.
- Optimize and implement processes for faster and more reliable deployment of microservices.
- Design and develop a customer monitoring dashboard for electric vehicle (EV) charging sessions using React and TypeScript.
- Build an admin panel for customer management and internal operations with React and TypeScript.
- Lead the development of a mobile app for managing EV charging sessions, from concept to deployment on the App Store and Google Play, using React Native and TypeScript.
- Implement backend solutions using Kotlin, Spring Boot, and PostgreSQL to support scalable and reliable application functionality.
- Configure and optimize CI/CD pipelines with CircleCI, Kubernetes, GitHub Actions, and Docker, ensuring efficient and reliable deployments.
- Develop and integrate payment solutions to meet product and business needs.

### Notch

Feb 2018 - Aug 2020

Software Engineer

Zagreb

🌐 <https://wearenotch.com>

- Worked as a full-stack engineer, contributing to diverse projects for multiple clients.
- Developed **Spotsie**, an indoor tracking solution utilizing Bluetooth beacons, with a tech stack including React, TypeScript, Java, and Spring Boot.
- Built a dashboard for client support centers to enhance operational efficiency, leveraging React, TypeScript, Kotlin, and Spring Boot.
- Created a dashboard for mathematicians at **Photomath** to streamline workflows, using React, TypeScript, Kotlin, and Spring Boot.

## Education

Zagreb University of Applied Sciences

Oct 2019 - May 2021

Professional Master of IT Engineering

Zagreb University of Applied Sciences

Oct 2016 - Jun 2019

Bachelor of Computer Engineering

Technical School Ruđer Bošković in Zagreb

Sept 2012 - Jun 2016

Computer Science Technician
